WORK FEEDBACK

NodeJS webapp for chat application
Rikai Labs China
I worked with Alex regularly over a couple year period to add many features to our chatbot platform. He has a wide knowledge from the latest reactJS techniques, implementing registration systems, working with sockets... handling a wide variety of complex tasks. He was very reliable in meeting deadlines, and constructive discussing design goals. Highly recommended!
Admin panel work
Private Person Great Britain
Alex was responsive, communicated well and delivered good results in a short space of time
